

## Key Words Index

Vol. 88 2021

### 1

18F-FDG PET/CT scan ..... (2) 145

### 2

24-hour intraocular pressure ..... (5) 509

### A

AAV vector ..... (2) 103

acute kidney injury ..... (6) 514

acute limb ischemia ..... (6) 540

adolescents ..... (1) 10

alogliptin ..... (1) 71

alternative splicing ..... (1) 54

androgen ..... (3) 248

anesthesia ..... (5) 418

anesthetic and perioperative management ... (2) 121

angiotensin receptors ..... (2) 113

animal model ..... (4) 311

anterior chamber ..... (2) 128

antipsychotics ..... (1) 10

aortic dissection ..... (5) 467

aqueous humor..... (2) 128

aromatase inhibitors ..... (4) 354

artery of Percheron ..... (4) 375

arthroscopic treatment..... (2) 133

atopic dermatitis ..... (3) 171

autoimmune hepatitis ..... (6) 569

### B

balloon dilator ..... (4) 367

BDNF ..... (2) 128

bevacizumab ..... (5) 496, (6) 574

bilateral paramedian thalamic infarcts ..... (4) 375

bone marrow sarcoidosis ..... (2) 145

bowel necrosis ..... (2) 88

brain metastases ..... (4) 319

brain natriuretic peptide ..... (5) 423

brain-derived neurotrophic factor ..... (2) 128

breast cancer ..... (5) 448

breast reconstruction ..... (1) 63

brodalumab ..... (6) 569

### C

cancer ..... (4) 273

capecitabine ..... (5) 496

carcinosarcoma ..... (6) 574

cardiomyocyte ..... (3) 209

cardiovascular events ..... (5) 432

cartilage ..... (4) 335

case report ..... (3) 238

cataract surgery ..... (3) 204

cerebral ischemic stroke ..... (3) 228

characteristics ..... (5) 467

chemotherapy ..... (3) 156

children ..... (1) 10, (3) 178

chronic hepatitis C ..... (3) 163

chronic kidney disease ..... (3) 163

circumferential distribution ..... (1) 32

classification ..... (1) 25

CME ..... (5) 506

colectomy ..... (4) 370

colon ..... (4) 370

colonic metastasis..... (6) 556

combined general and epidural anesthesia ... (2) 121

comma-shaped incision ..... (3) 258

compatibility ..... (6) 533

complication ..... (4) 367

comprehensive risk factor control ..... (5) 432

congenital heart defects ..... (4) 347

conservative treatment ..... (4) 335

contact dermatitis..... (3) 253

coronavirus disease ..... (1) 80

coronavirus disease (COVID-19) ..... (6) 533

corrective osteotomy ..... (3) 262

corticosteroid ..... (4) 296

COVID-19 ..... (1) 80, (4) 380

cranial nerve palsy ..... (6) 561

cross-reaction ..... (3) 253

cryptococcal meningitis ..... (4) 375

cystoid macular edema ..... (5) 506

### D

decision support ..... (4) 273

|                                        |     |     |
|----------------------------------------|-----|-----|
| deep-vein thrombosis                   | (4) | 268 |
| desflurane                             | (5) | 418 |
| diabetes                               | (5) | 461 |
| dilatation                             | (4) | 370 |
| direct-acting antivirals               | (3) | 163 |
| disease outbreaks                      | (3) | 220 |
| distal pancreatectomy                  | (4) | 301 |
| diurnal intraocular pressure variation | (5) | 509 |
| DNA microarray                         | (3) | 209 |
| drug administration route              | (6) | 533 |
| dry eye                                | (3) | 204 |
| dual-energy X-ray absorptiometry       | (4) | 296 |

## E

|                                     |     |     |
|-------------------------------------|-----|-----|
| effectiveness                       | (1) | 10  |
| efinaconazole                       | (3) | 253 |
| ejection fraction                   | (5) | 423 |
| EL mice                             | (3) | 189 |
| emotion                             | (5) | 485 |
| endogenous peritonitis              | (5) | 461 |
| endoscopic detorsion                | (6) | 544 |
| endoscopic full-thickness resection | (1) | 17  |
| endoscopic muscle biopsy            | (5) | 441 |
| endoscopic resection                | (3) | 156 |
| endoscopic submucosal dissection    | (1) | 17  |
| endoscopy                           | (1) | 32  |
| endovascular procedure              | (6) | 540 |
| epidemics                           | (3) | 220 |
| epidural blood patch                | (4) | 291 |
| epiretinal membrane                 | (2) | 97  |
| epistaxis                           | (6) | 516 |
| epithelial-myoepithelial carcinoma  | (3) | 238 |
| ESR2                                | (1) | 54  |
| estrogen receptor $\beta$           | (1) | 54  |
| ethanol                             | (3) | 209 |
| etiology                            | (3) | 178 |
| exemestane                          | (4) | 354 |
| extensor pollicis longus            | (5) | 500 |
| extensor tendon                     | (5) | 500 |
| external fixator                    | (3) | 262 |
| extubation failure                  | (5) | 408 |

## F

|                         |     |     |
|-------------------------|-----|-----|
| fallopian tube          | (6) | 574 |
| fever of unknown origin | (2) | 145 |
| finger                  | (3) | 262 |

|                                    |     |     |
|------------------------------------|-----|-----|
| fMRI                               | (5) | 485 |
| focal segmental glomerulosclerosis | (6) | 579 |
| functional disorder                | (5) | 441 |

## G

|                                |                               |     |
|--------------------------------|-------------------------------|-----|
| ganglion cell complex          | (2)                           | 97  |
| gastrectomy                    | (3)                           | 242 |
| gastric cancer                 | (3) 156, (3) 242, (6)         | 544 |
| generalized pustular psoriasis | (6)                           | 569 |
| Glasgow Outcome Scale          | (3)                           | 194 |
| glaucoma                       | (2) 97, (2) 128, (5) 506, (5) | 509 |
| glucose-to-potassium ratio     | (4)                           | 342 |
| gonadal steroid hormones       | (2)                           | 113 |
| growth hormone deficiency      | (1)                           | 39  |

## H

|                             |              |     |
|-----------------------------|--------------|-----|
| hand                        | (5)          | 500 |
| Hashimoto's encephalopathy  | (4)          | 375 |
| hazards model               | (4)          | 319 |
| head injury                 | (4)          | 342 |
| heart failure               | (2) 113, (5) | 423 |
| heat-related illness        | (1)          | 80  |
| heatstroke                  | (1)          | 80  |
| hepatocellular carcinoma    | (2)          | 138 |
| hirsutism                   | (3)          | 248 |
| histological analysis       | (3)          | 228 |
| hospital                    | (3)          | 220 |
| hypertension                | (6)          | 551 |
| hypertension, essential     | (3)          | 178 |
| hypertension, secondary     | (3)          | 178 |
| hypertensive cardiomyopathy | (6)          | 551 |
| hypertrophic scar           | (1) 2, (3)   | 258 |

## I

|                                 |     |     |
|---------------------------------|-----|-----|
| IgG index                       | (4) | 380 |
| IgG4-hepatopathy                | (2) | 138 |
| IgG4-related disease            | (2) | 138 |
| Ilizarov mini-fixator           | (3) | 262 |
| immune organ response           | (3) | 228 |
| immunohistochemistry            | (6) | 564 |
| induced hyperthermia            | (4) | 335 |
| inflammation                    | (3) | 228 |
| influenza vaccine effectiveness | (6) | 524 |
| Ingenuity Pathway Analysis      | (3) | 209 |
| injection                       | (2) | 103 |
| intensive care unit             | (5) | 408 |

|                                        |     |     |
|----------------------------------------|-----|-----|
| inter-arm difference in blood pressure | (5) | 467 |
| interclavicular jugular notch          | (3) | 258 |
