

## Key Words Index

Vol. 89 2022

### A

|   |     |     |
|---|-----|-----|
| <i>A20</i> mutation   | (3) | 301 |
| abemaciclib   | (1) | 88  |
| abortion  | (1) | 40  |
| actin-bundling protein  | (1) | 24  |
| <i>ACTN4</i>  | (1) | 24  |
| acute encephalopathy  | (6) | 640 |
| acute focal bacterial nephritis                               | (6) | 640 |
| acute myeloid leukemia  | (5) | 470 |
| adenoid cystic carcinoma                                      | (4) | 460 |
| adenoid cystic carcinoma of the trachea                       | (4) | 460 |
| adolescents   | (2) | 203 |
| adrenal cortex hormones                                       | (6) | 580 |
| Adult-onset Still's disease                                   | (1) | 114 |
| airway obstruction  | (5) | 526 |
| AL cardiac amyloidosis  | (1) | 119 |
| allogeneic hematopoietic cell transplantation                 | (5) | 470 |
| AminoIndex Cancer Screening                                   | (4) | 377 |
| analgesia   | (4) | 399 |
| anaplastic thyroid carcinoma                                  | (4) | 460 |
| anemia  | (2) | 233 |
| ankle-brachial index  | (3) | 342 |
| anorectal melanoma  | (4) | 368 |
| anorexia  | (2) | 139 |
| anti-severe acute respiratory syndrome coronavirus 2 antibody | (5) | 513 |
| anti-VEGF   | (2) | 128 |
| antiphospholipid antibodies                                   | (1) | 40  |
| Antoni classification   | (6) | 629 |
| anxiety   | (3) | 328 |
| apalutamide   | (5) | 550 |
| apoptosis   | (2) | 184 |
| arrhythmia  | (1) | 119 |
| aspiration  | (1) | 2   |
| aspirin   | (1) | 40  |
| association study   | (6) | 587 |
| attention-deficit hyperactivity disorder                      | (2) | 190 |
| autism spectrum disorder                                      | (2) | 190 |
| autopsy   | (6) | 616 |

autosomal dominant polycystic

|                 |     |     |
|-----------------|-----|-----|
| kidney disease  | (3) | 287 |
| axillary keloid | (6) | 645 |

### B

|                              |                 |     |
|------------------------------|-----------------|-----|
| bacteremia                   | (6)             | 570 |
| bath tub                     | (1)             | 33  |
| benign prostatic hyperplasia | (4)             | 436 |
| bilobed flap                 | (6)             | 606 |
| biologics                    | (6)             | 587 |
| biomarker                    | (1)             | 24  |
| blunt trauma                 | (3)             | 342 |
| boot camp                    | (4)             | 443 |
| bowel motility               | (2)             | 212 |
| breast cancer                | (1) 66, (4) 377 |     |
| bronchial arteries           | (6)             | 594 |

### C

|   |                                    |     |
|---|------------------------------------|-----|
| cancer  | (1)                                | 16  |
| cancer patient  | (4)                                | 428 |
| capitellum  | (1)                                | 81  |
| carcinoma of unknown primary                              | (4)                                | 454 |
| cardiopulmonary arrest                                    | (1)                                | 33  |
| cardiovascular abnormalities                              | (6)                                | 594 |
| caregiver   | (4)                                | 428 |
| CD-DST  | (4)                                | 412 |
| cellular dynamics   | (1)                                | 9   |
| central venous catheters                                  | (5)                                | 555 |
| cerebral palsy  | (3)                                | 263 |
| cesarean delivery   | (5)                                | 533 |
| cesarean section  | (6)                                | 580 |
| chemotherapy  | (2) 139, (2) 145, (3) 246, (4) 412 |     |
| chest tubes   | (5)                                | 555 |
| children  | (1) 47, (2) 203                    |     |
| chromosome aberrations                                    | (1)                                | 40  |
| chronic inflammatory demyelinating polyradiculoneuropathy | (5)                                | 562 |
| chronic kidney disease                                    | (4)                                | 360 |
| clear cell sarcoma of the kidney                          | (2)                                | 233 |
| clinical classification                                   | (2)                                | 176 |
| clinical competence                                       | (4)                                | 443 |
| colon cancer  | (4)                                | 399 |

|                                       |                                   |
|---------------------------------------|-----------------------------------|
| colorectal cancer                     | (3) 246, (4) 368                  |
| compatibility chart                   | (2) 227                           |
| complications                         | (5) 555                           |
| computer simulations                  | (1) 9                             |
| conformational change                 | (1) 9                             |
| congenital biliary dilatation         | (6) 623                           |
| coronal shear fracture                | (1) 81                            |
| coronavirus disease                   | (5) 513                           |
| coronavirus disease 2019              | (3) 328, (4) 422                  |
| coronavirus entry-promoting factors   | (1) 95                            |
| coronavirus entry-restricting factors | (1) 95                            |
| correction of varus deformity         | (1) 108                           |
| cortical destruction                  | (4) 384                           |
| corticosteroid therapy                | (4) 422                           |
| COVID-19                              | (1) 95, (2) 161, (5) 479, (5) 500 |
| cutaneous ossification                | (5) 546                           |
| cyclobutane pyrimidine dimer          | (2) 184                           |
| cytology                              | (6) 616                           |

## D

|   |                  |
|---|------------------|
| da Vinci Surgical system                    | (2) 169          |
| death                                       | (1) 33           |
| delivery of health care                     | (6) 580          |
| depression                                  | (3) 328, (4) 392 |
| depressive symptoms                         | (1) 16           |
| desmoplastic malignant pleural mesothelioma | (6) 616          |
| dexmedetomidine                             | (4) 399          |
| diagnosis                                   | (1) 2            |
| dilution technique                          | (5) 533          |
| disease activity                            | (6) 587          |
| distal humeral fracture                     | (5) 506          |
| distal humeral fractures                    | (1) 81           |
| DNA repair                                  | (2) 184          |
| double-plate osteosynthesis                 | (5) 506          |
| drug eruption                               | (5) 550          |
| drug incompatibility                        | (2) 227          |

## E

|                     |         |
|---------------------|---------|
| ECG                 | (1) 119 |
| efficacy            | (4) 436 |
| elbow fracture      | (5) 506 |
| elbow injury        | (1) 81  |
| elderly             | (2) 196 |
| electromyography    | (5) 562 |
| electron microscopy | (4) 368 |
| embolization        | (6) 594 |

|                                       |         |
|---------------------------------------|---------|
| emergency ambulance system            | (5) 526 |
| endoscopic thyroidectomy              | (3) 277 |
| endoscopy                             | (3) 246 |
| endosonography                        | (3) 255 |
| endothelial function                  | (3) 316 |
| endovascular stent-graft implantation | (3) 342 |
| eribulin                              | (5) 494 |
| everolimus                            | (1) 88  |
| exercise                              | (3) 316 |
| external fixation                     | (3) 309 |
| external iliac artery                 | (3) 342 |

## F

|   |         |
|---|---------|
| fatty acid binding protein 7              | (4) 460 |
| febuxostat                                | (4) 360 |
| fenestration                              | (1) 2   |
| ferritin                                  | (2) 203 |
| fetal ultrasound                          | (3) 337 |
| fine-needle aspiration cytology           | (4) 460 |
| finger                                    | (6) 599 |
| first aid                                 | (5) 526 |
| flexor tendon rupture                     | (3) 347 |
| FLT3 inhibitor                            | (5) 470 |
| fluid accumulation                        | (6) 623 |
| fluorescence <i>in situ</i> hybridization | (6) 616 |
| frailty                                   | (3) 295 |
| functional dyspepsia                      | (3) 255 |
| functional heartburn                      | (1) 56  |

## G

|                          |                           |
|--------------------------|---------------------------|
| gasless lifting method   | (3) 277                   |
| gastric cancer           | (2) 215, (4) 412, (5) 487 |
| GCTB                     | (6) 572                   |
| gene diagnosis           | (5) 470                   |
| general malaise          | (2) 139                   |
| genetic counseling       | (5) 520                   |
| genetic screening        | (1) 66                    |
| geriatrics               | (6) 606                   |
| giant cell tumor of bone | (6) 572                   |
| glioma                   | (3) 269                   |
| glucagon                 | (1) 102                   |
| gross total resection    | (3) 269                   |
| gut microbiota           | (3) 316                   |
